"SLASHBUSTER"®

LW 362M

Excavator Mounted Stirring Attachment

"SLASHBUSTER"

State-of-the-Art
Land Management and
Right-of-Way Equipment

"SLASHBUSTER"®

LW 362M

Excavator Mounted Stirring Attachment

LW 362M

General Specifications

Adaptable to 2-50 ton excavators
48" stirring depth (standard model)
Sealed bearing assembly
Self-purging grease system
Continuous underwater operation
Quick change mounting pins
Boom geometry not modified
Automatic wire shear standard
Rotating hub debris guard standard
Adjustable RPM

Basic Installation Requirements

Motor Circuit:

Continuous service priority flow required
Flow to 60 GPM
Pressure to 3850 PSI
Three position directional control valve recommended
Adjustable flow available
Forward, neutral and reverse rotation
"SLASHBUSTER"® attachments are provided with crossport relief and anti-cavitation protection

Recommended Electric:

20 Amp auxiliary circuit recommended
Foot-operated master on/off switch recommended
Cab-mounted control for forward, neutral and reverse with indicator light recommended

Note: It is recommended that the excavator is provided with a hinged front screen guard for the front of the cab that meets or exceeds SAE J1084

"SLASHBUSTER"®
EQUIPMENT
Unmatched in Performance, Reliability and Output

- **INCREASE PRODUCTION** with a continuous stirring action
- **INCREASE PROFITS** low maintenance and low initial cost
- **EASY TO OPERATE** helps prevent damage to cell lining
- **LASER DEPTH CONTROL** option to aid in performance
- **VERSATILE** adaptable to any excavator
- **STRONG** not affected by lumber or plastic in slurry
